7600

# ODYSSEY<sup>2</sup>

The Ultimate  
Computer Video Game  
System

Odyssey<sup>2</sup> is a source of fun, games and learning for the entire family. It easily attaches to any TV... and telecasts in rich vivid color on a color TV. An alpha-numeric keyboard commands this new kind of microprocessor video system that is infinitely more sophisticated than ordinary home TV games... even surpasses most arcade games! A variety of sports, learning and arcade games are now available (see other side); more are on the way. Baseball, with its life-like action players, is depicted above. Included with Odyssey<sup>2</sup> are two action-packed arcade games and one mental block-buster: Speedway, Spin-out and Crypto-Logic!

# Model 7600 Odyssey<sup>2</sup>

The ultimate computer video game system.

Its only limitation is your own imagination!

Odyssey<sup>2</sup> game cartridges offer multi-level play capability. Many cartridges present extremely sophisticated strategic challenges adults will never outgrow. And, these same cartridges also offer scaled down playing levels that younger children will enjoy. Many Odyssey<sup>2</sup> game cartridges are available now (some of which are illustrated); new ones will always be on the way! Many of the Odyssey<sup>2</sup> game cartridges contain two or more generic games playable at different strategic levels — not simply variations of a single theme. This makes a widely varied collection of Odyssey<sup>2</sup> games much more economical to acquire.

NOTE: NOT SHOWN . . . COSMIC CONFLICT, COMPUTERIZED GOLF AND COMPUTER INTRO; as well as CRYPTO-LOGIC.

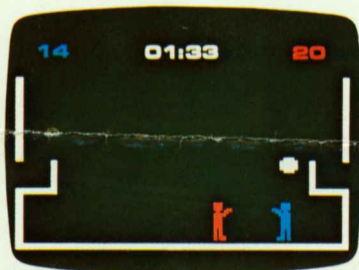

FOOTBALL
